Your Bathroom with the KENNEY SHOWER

The New Way to Bathe

THE DAILY BATH HABIT, now practiced by every one who values health as well as self-respect, has revolutionized the bath. It was inevitable that this should be so. The home without a bathroom is unthinkable today. The DAILY BATH is a family practice in the home where the refinements of life and the maxims of health have their proper place. It is precisely because of these facts that human genius had to find the way to make possible the BATH A DAY for every member of the family. And genius did it.

No longer do you have to dawdle with the tub bath, the dead water, the floating suds, the sodden sponge, or the sunken washcloth and all the rest of the unpleasantness and cleaning-up aftermaths.

TODAY YOU SHOWER BATHE in running water, fresh water, live water, sparkling water, luxury water, health water.

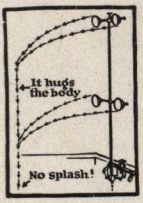
Today you BATHE; you don't SOAK; instead of cheating your body with a final rinsing in soapy, oily, polluted water, you step out from clean, running water, refreshing water, invigorating streams.

THE NEW way to bathe is the SHOWER way to bathe, and the SHOWER way to bathe is the KENNEY SHOWER way to bathe.

The Kenney Shower—
its part in bathroom sanitation

THE KENNEY SHOWER equipped bathroom is essentially a model of trim attractiveness, a joy to the housewife, a pleasure to every member of the family. That's the story of it everywhere, as a part of the bathroom equipment.

THE KENNEY SHOWER in operation is far more important, vastly more impressive. Contrast, if you will, the antiquated overhead shower, with clouds of scalding steam or clammy, dead, cold vapor, confined within the impractical, unsightly and unsanitary curtains,—the suffocating deluge of water from above—the discomfort of it all—contrast that with the KENNEY SHOWER, with its wonderful needle sprays of regulated water rushing uniformly upon you, in its inward and downward streams, hugging the body, carrying off instantly the impurities, constantly changing, always cleansing, curtainless, splashless. Look at your bathroom after the old-time kind of a bath and contemplate the work which must be done before another can find the bath presentable.



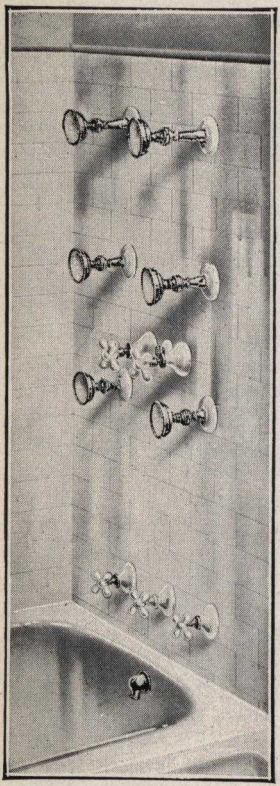
And then, in your mind's eye picture the same bath untouched after a KENNEY SHOWER bath—spotlessly ready.

THE KENNEY SHOWER requires no unsightly, unsanitary curtain and there is no splashing of walls, no wet floors.

THE KENNEY SHOWER equipped bathroom is the acme of sanitation.

Congress Concealed Model

A HANDSOME fixture—a utility fixture—the last word in appearance and efficiency. A practical shower, it meets the requirements of those who know the charm of the bathroom equipped with concealed fixtures. There are six shower heads. Six needle streams envelop the whole body—without wetting the head.



Each shower head is of the removable face type—easy to clean. Each head is supported by ball-joint, making possible vertical adjustment, without impairing the wonderful principle of converging streams, found exclusively in KENNEY SHOWERS.

The escutcheons and the valve handles are all of clear, white, bone china, a matchless finishing touch.

A governor regulates the volume of water.

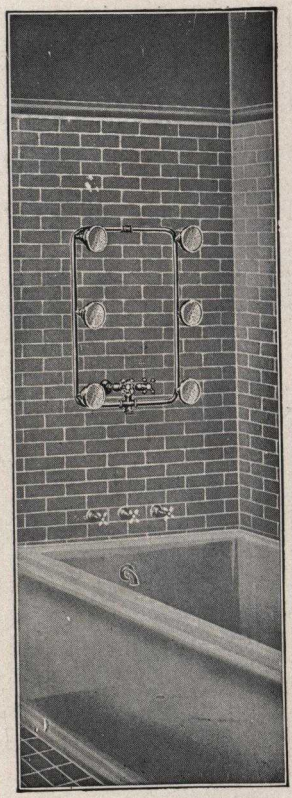
The Congress Concealed model is designed for use in combination with recessed tub or shower stall.

The fixture is assembled complete including all concealed parts, which are of heavy brass pipe and brass fittings.

A mixing valve may be substituted for the hot and cold valve control.

Congress Wall Model

HERE is a practical shower for general use—Homes, Apartments and Hotels. A heavy brass frame, on which are mounted six removable face shower heads. The heads are set at converging angles. A strong wall brace and horizontal control valves are part of this fixture. A governor is a part of this fixture to control the volume of water.



The Congress wall model as stocked is furnished in Nickel Plate which is very attractive, or it may be had special in white porceloid finish.

Special features of this model are its minimum labor cost in installation, economy of space, water consumption and, of course, the saving of curtains and the cost of their up-keep.

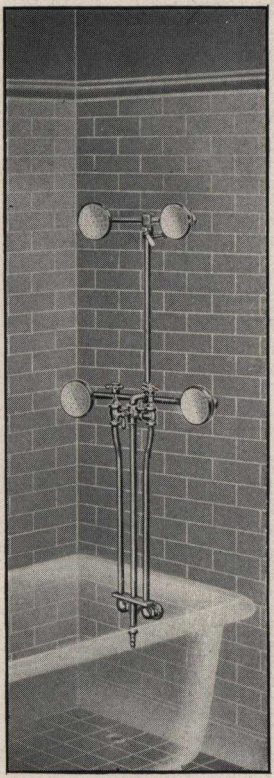
De Luxe Model

TUB TYPE

A MOST efficient and general utility shower, —combining as it does, shower, tub supplies and shampoo all in one,—made of heavy brass pipe and beautifully finished in heavy nickel plate.



The water is controlled conveniently at elbow height; a three-way valve directs the water either up through shower or down into tub. The two upper shower heads may be turned off and the lower heads used as a shampoo or for bathing children.

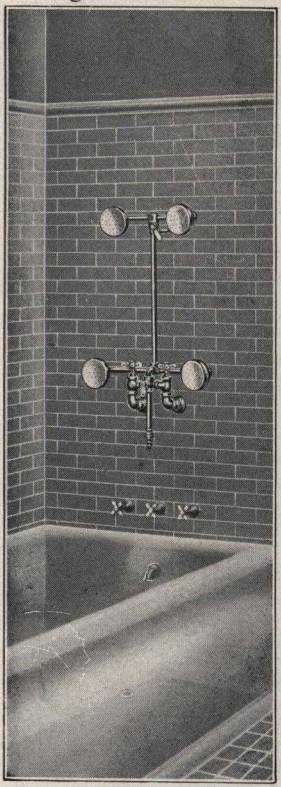
The cost of installation is small,—no more than that of a bath cock.

This practical shower in addition to its several savings and advantages, is installed without tearing out the walls or the labor cost of concealed supplies.

De Luxe Model

WALL TYPE

OF SPECIAL interest is this De Luxe model, having the same conveniences as the tub type,



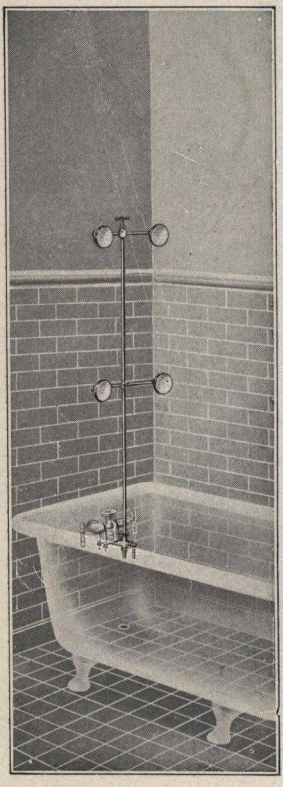
but installed over the end of a built-in tub or in a stall. This general utility shower adds to the attractiveness of the bath room; shower tub supply and shampoo, all controlled by the same handles, make it decidely convenient and practical. This fixture has found favor in hospitals and sanitariums. The attendant finds it convenient to bathe patients and with the control of the two upper heads it is practical for use in cases where only a portion of the body is to be bathed.

It is equipped with special outlet to be used either for filling the tub or for cleaning and filling vessels.

Niagara Model

PORTABLE

THE recognized necessity for a shower bath in every home has created a widespread demand for this substantial portable KENNEY SHOWER. The shower is an all-metal nickel-plated brass fixture. Fits any bath cock; any one can attach it.



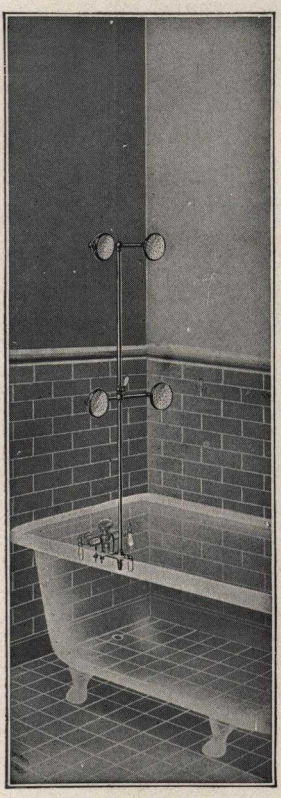
The holdfast is equipped with a two-way valve that directs the water either up into the shower or down into the tub. At the top crossarm a valve controls the top shower heads, thus making possible the use of the lower heads for shampoo or bathing children.

Sold at a remarkably low price, bringing within the reach of every home the luxury of the shower bath.

Palm Beach Model

PORTABLE

As THE Niagara Model has created a demand for a practical, no-splash Curtainless portable shower at a price within reach of everyone's pocketbook, the Palm Beach model has been designed for those who wish a bit more pretentious fixture. It is made of larger size brass tubing, with three-inch shower heads and with china handles on the control valves, making it a striking and handsome fixture.



The Palm Beach is easily at home in the finest bathroom and people who want a shower that they can attach themselves, without the tearing out of walls and floor, find this fixture ideal for the purpose.
